6. How do you feel about mathematics? (A choice of ten stars indicates that mathematics is one of your favorite subjects; a choice of one star indicates you do not like mathematics at all.)

7. How have you performed in previous mathematics courses? (A choice of ten stars indicates that you have consistently excelled in your past mathematics courses; a choice of one star indicates that you have had to retake more than one mathematics course.)

8. Why are you enrolled in MATH 125? (Check all that apply.)

It fulfills a degree requirement.

I enjoy learning about new mathematics.

I am your instructor!

9. What are your "realistic" career plans?

I intend to become a professor of mathematics at some college or university. I would love to return to my alma mater Missouri State University to teach.

10. What is your "dream job?"

I am an impassioned musician and freelance music producer. If I could drop everything right now and successfully pursue a career in music production, I would.

11. What hobbies or activities do you enjoy in your free time?

I record and produce music for three different bands. Here is our LinkTree!
https://linktr.ee/for_love_of_carlo Other than that, I have recently endeavored to beat Pokémon Crystal. I enjoy board games (e.g., Fibbage and Quiplash on JackBox Games), cycling, cooking, and listening to music, as well.

12. What is something you believe I might enjoy? (For instance, this can be artistic like a song or album, a television series or movie, a video or board game, a book, a photograph or painting, or it could be a food item, a restaurant, a vacation destination, etc. Use your imagination!)

I will recommend one of each! (I have a lot of opinions.) - Sufjan Stevens is my favorite musician. ILLINOIS is my favorite album of his. - Over the break, I watched both seasons of DAVE. It was surprisingly wholesome and pretty funny. - If you enjoy outlandish humor, I recommend the films THE SURE THING and THE BIG LEBOWSKI. - The MEGA MAN X video game series is an all-time favorite. I am currently playing through them all again. - HAMLET

is one of my favorite books. I am also fond of the Harry Potter series. - Melissa Santamaría (@melissazrttt) does incredible generative art. - If you're ever in Kansas City, Missouri, be sure to drop by Dead Beet Eats for an amazing vegan hot dog.

13. How much wood would a woodchuck chuck if a woodchuck could chuck wood?

A woodchuck cannot chuck wood. Therefore, the antecedent is false, so any answer is vacuously true. Have fun!
